

HIPAA Compliance Policy

Purpose

This HIPAA Compliance Policy establishes requirements for protecting Protected Health Information (PHI) in accordance with the HIPAA Privacy Rule and Security Rule.

Scope

This compliance policy applies to all workforce members with access to PHI, including clinical, administrative, and technical staff.

Protected Health Information

PHI includes any individually identifiable health information transmitted or maintained in any form. Workforce members must access PHI only as required for their job function.

Security Rule Safeguards

The organization maintains administrative, physical, and technical safeguards including access controls, audit logging, and encryption of PHI at rest and in transit.

Breach Notification

Any suspected breach of PHI must be reported to the Privacy Officer within twenty-four (24) hours of discovery, consistent with the Breach Notification Rule.

Enforcement

Violations of this compliance policy may result in disciplinary action up to and including termination, consistent with applicable regulation.
